

## Andrews DNA Lineage Research Project

**Hypothesis: Can DNA testing prove that the three below Andrews lineages are all descendants of George H. Andrews, who is in the 1830, 1840, 1850 and 1860 (as Andrus) Franklin Co., Ohio censuses?**

**Why? Because:**

One family tree has Ray W. Andrews being the son of Hiram Andrews of Ohio, whereas the 1830 and 1840 census implies that he was George H. Andrews' son.

Most Recent Common Ancestor:      **George H. Andrews**

Sons: **William C. Andrews**  
Born: 1812 in NY State

**George T. Andrews**  
1807 in NY State

**Ray W. Andrews**  
ca 1825 in Ohio

Their sons:

**William C. Andrews**  
Born: Sept 1861 in Indiana  
**Newton Andrews**  
Born: ca 1842/3

**Ruthven Crosby Andrews**  
1832 in Ohio

**Colonel C. Andrews**  
ca 1858 in Illinois  
**Douglas A. Andrews**  
ca 1854 in Illinois

Descendants:

**William F. Andrews**  
Born: Oct 1895 in Indiana

Sons: **George, Clarence,  
Albert, John & Herbert.**  
Born: Iowa or Missouri

**Ashby F. Andrews, Sr.**  
14 Aug 1903  
**Colonel Douglas Andrews**  
5 Jul 1909

**William H. Andrews**  
Born: ca 1921 in Indiana

**Richard Lee Andrews**  
Born: ca 1926 in Indiana

**Two living Andrews  
DNA tests have been  
completed.**

Thus we are seeking male Andrews, who are descendants of any of the above Andrews, to participate in Y-DNA testing, for comparison to the DNA results already available.

We are also seeking male Andrews for Y-DNA testing who are descendants of William Andrews, who was in New Haven, Conn. in 1640, and who is the original immigrant.
