Notes for FRANCOIS LAROCQUE:

Much of the information found here comes from "Francois Larocque, the Acadian Family." A contribution of John, Robert and Michael Larocque.

A refugee of the English deportation of French residents of Acadia. François, Charles and Georges were present at St-Godefroi, then within the boundaries of Paspébiac, as early as 1765, according to the census taken that year.

The main source suggests that François may have been a Basque but this is by no means certain.

Some of the subsequent data regarding the birth years of descendants may suggest that a revision of estimated dates is needed for this couple and their children, as they may have been born earlier than supposed. There are too many estimated dates to be certain of anything. For example, Catherine is shown to have a child born in 1837, which would be unlikely with dates as originally estimated. The 1837 date is not given as an estimate but who knows?

There are differing but non-conflicting accounts of François' death. If the "both drowned" account is correct, it may suggest that husband and wife were together when they died. François was a fisherman and they could well have been aboard the same boat at the time and place indicated by the 2nd account?
